RESPONSE TO NOTIFICATION OF DEFECTIVE RESPONSE

Dear Sir:

In the Notification of Defective Response that we received from the United States Patent and Trademark Office dated June 18, 2002, it is stated that we must provide a Sequence Listing on paper copy or on compact disc. Since this application is an electrical application and does not include any nucleotide and/or amino acid sequence disclosure, we believe that this is an error and a sequence listing is not necessary to complete the requirements for this application.

In addition, we have made several attempts to discuss this matter with Paulette R. Kidwell of the United States Patent and Trademark Office for the above-identified application. She was not able to retrieve this file and instructed us to submit a Notification of Defective Response indicating that a Sequence Listing was not required for this electrical application.

We would appreciate you addressing this matter and confirming that this Notice was sent in error.

Respectfully submitted,

Paul D. Greeley
